

Hospitalized patients at ICVS are all under the care of ICVS' experienced and licensed veterinarians and veterinary technicians.

Patients undergo regular examinations during hospitalization with administration of medications, injections and fluids as required. All pets at ICVS are provided with safe legally registered pet foods or prescription diets and fresh spring water during their stays.

Owners are provided with regular health status updates by the ICVS medical team and are welcome to visit their pets during hospital visiting hours.

Please contact ICVS with any questions about hospitalization care for pets.
